

Credit, Advanced Standing and Accelerated Entry Policy (MPF1293)

1. Objective

The objectives of this policy are to:

- (a) provide the framework for the awarding of academic credit for prior study or learning while maintaining academic standards for University of Melbourne courses;
- (b) set clear responsibilities and accountabilities for academic credit decisions;
- (c) ensure that academic credit processes are transparent and decisions are consistent and fair; and
- (d) facilitate movement of students between institutions and courses.

2. Scope

This policy applies to:

- (a) all University of Melbourne courses;
- (b) students of the University; and
- (c) individuals applying to study at the University who consider they have had prior learning experiences which would potentially attract credit, advanced standing or accelerated entry to a University of Melbourne course.

3. Authority

This Policy is made under the [University of Melbourne Act 2009\(Vic\)](#), the University of Melbourne Statute and the [Academic Board Regulation](#) and supports compliance with the AQF Qualifications Pathway Policy.

4. Policy

4.1. The University recognises and grants advanced standing and accelerated entry to its courses where specified conditions are met, with or without the concurrent granting of credit points.

Advanced Standing

4.2. Advanced standing is the waiving of the need to take a subject or subjects, with or without the concurrent granting of credit points. It is granted in relation to a course of study and in particular is applied to compulsory or core subjects but may be granted for other subjects.

4.3. A dean may grant advanced standing on the basis of:

- (a) prior studies undertaken as part of a complete or incomplete university-level award course;
- (b) high-level additional work completed at secondary school level;

(c) studies undertaken in some non-award programs at the University including the University of Melbourne Extension Program and assessed Community Access Program (CAP) studies, except where CAP is taken to demonstrate academic rehabilitation or used to meet the entry requirements for a course;

(d) substantial relevant, documented professional work experience for students in some graduate programs;

(e) Technical and Further Education (TAFE) study in a diploma or an advanced diploma where there are articulation arrangements with a bachelor degree or an associate degree program;

(f) TAFE study at diploma or advanced diploma level where there are articulation arrangements with an associate degree program; or

(g) Polytechnic study where specific articulation into undergraduate degree programs have been agreed.

4.4. The University may establish agreements with partner institutions, or provide undertakings to students, that specify pre-approved credit arrangements. These arrangements will comply with this policy except where the Board has approved otherwise. Examples of programs include:

(a) Student exchange or study abroad programs;

(b) Cross-institutional study arrangements;

(c) Group of Eight Credit Transfer Agreement;

(d) Special arrangements established with polytechnics; and

(e) Dual programs established by the Board.

4.5. Students may decline the award of advanced standing or accept it without credit points, except where the credit is awarded for:

(a) subjects that are deemed to be equivalent;

(b) are both subjects of the University; and

(c) are completed within the timeline for granting of credit.

4.6. Grades for subjects taken at other institutions are not recorded on a student's record except in some cases where advanced standing with credit is granted for studies undertaken as part of student exchange or study abroad programs.

4.7. Changes to academic credit arrangements must not disadvantage any applicants with a current offer.

Types of advanced standing with credit arrangements

4.8. Two types of credit may be granted:

(a) exempt advanced standing is credit granted in relation to successful completion of a subject or subjects, or studies, which are deemed substantially equivalent to the subject being waived;

(b) general advanced standing is credit granted in relation to an unspecified discipline area, subject, or group of subjects.

4.9. The type of credit granted will be determined with reference to the following:

- (a) course requirements;
- (b) content;
- (c) learning outcomes;
- (d) assessment methods;
- (e) contact hours;
- (f) volume of learning; and
- (g) credit point weighting.

4.10. Exempt advanced standing is granted for a subject or subjects common to both the previous and current/new course in the following circumstances:

- (a) the subject completed in the first course is a compulsory or core subject in the second course, whether or not the first course was completed in its entirety; or
- (b) the first and second courses together constitute an approved combined course.

Limitations on the granting of credit

4.11. The maximum credit which may be granted for study completed at another institution is 50% of the total credit points of the course unless the Board approves otherwise in the course approval instrument.

4.12. A maximum of 100 points is cross-credited when a student completes two bachelor degrees sequentially.

4.13. A completed University of Melbourne two-year diploma or associate degree may attract a maximum credit of 200 points towards a three-year bachelor degree. This will normally include 50 points towards the breadth component of a bachelor degree. For associate degrees and advanced diplomas completed elsewhere the 50% maximum credit rule applies.

4.14. The maximum amount of credit available in a bachelor honours program is 25 points towards the coursework component.

4.15. Credit will not be awarded:

- (a) where the content of a subject taken in the previous course has become out of date; this limitation also applies to students resuming their studies in a course following discontinuation or termination of enrolment;
- (a) on the basis of failed or incomplete subjects;

- (b) where a conceded or compensatory pass has been awarded;
- (c) on the basis of studies completed at another institution while a student is deferred or on leave of absence from the University of Melbourne; or
- (d) where the subject was taken outside the maximum time allowed to complete a course; this includes where the subject falls outside the credit limitation during the student's enrolment.

4.16. The following time limitations apply to the granting of credit:

Degree type	Credit points in course	Credit time limit in years
Bachelor	300	8 years
Graduate certificate	50	2 years
Graduate diploma	50	2 years
	100	4 years
Master	100	3 years
	150	4 years
	200	6 years
	300	8 years
	400	10 years
Doctor	300 (EFTSL 3 years)	8 years
	400 (EFTSL 4 years)	10 years

4.17. The relevant dean may waive the credit time limitations at 4.16 and allow subjects taken up to 10 years prior to be recognised.

4.18. If there is any doubt as to a student's ability to progress to higher level studies following award of credit, the dean may require a student to demonstrate their competence in the relevant subject area.

4.19. Credit will only be granted for entire subjects, not part subjects.

4.20. Credit towards graduate programs on the basis of studies undertaken at undergraduate level may only be granted in the following circumstances:

- (a) where the graduate program is a master degree of more than 150 points, and the credit is granted for matching relevant subjects that are not part of the final 150 points of the master degree;
- (b) where the graduate program is at graduate certificate or graduate diploma level and students have undertaken matching relevant subjects at an appropriate level as part of a bachelor degree.

4.21. A student cannot rescind credit points for subjects already completed in their course in order to replace them with credit granted under this policy.

Nested programs

4.22. Students moving from an earlier stage of a nested program to a later stage at the University will receive full credit for studies undertaken in the earlier stage, whether or not they have taken out the earlier award, subject to the time limitations rule at 4.16.

Accelerated subject entry

4.23. Accelerated subject entry is a type of advanced standing.

4.24. A dean may grant students accelerated subject entry, with or without credit points, where the student has demonstrated mastery of the content of a first-year subject through:

- (a) outstanding results in relevant secondary studies, and/or
- (b) completion of work at an equivalent level to the subject through other means, often higher-level work associated with but additional to a secondary school educational program, such as the University of Melbourne Extension Program, the Maths Olympiad, or advanced language studies, and/or
- (c) completion of specified additional work, or an exemption examination set by the relevant academic unit, to a high standard (usually 70% or equivalent).

4.25. Accelerated subject entry is most commonly granted where:

- (a) the subject for which advanced standing is sought is offered in place of a Year 12 prerequisite for another subject, or
- (b) the University offers several different undergraduate sequences of study with different entry points and educational outcomes.

4.26. Students may decline the award of accelerated subject entry, or accept it without credit points.

Cross-institutional study

4.27. Credit may be given on the basis of cross-institutional study at another Australian tertiary institution with the prior approval of the relevant dean. Any subsequent changes must be approved by the dean.

4.28. The standard maximum credit limits apply to cross-institutional study.

Student exchange and study abroad programs

4.29. Credit may be granted on the basis of studies undertaken at an overseas institution as part of a student exchange or study abroad program.

4.30. Students in student exchange or study abroad programs must have their credit arrangements approved by the dean before the program commences, and negotiate any subsequent changes with the dean.

4.31. The following maximum limits apply to credit granted for student exchange or study abroad programs:

- (a) 100 points for credit towards an award course of 200 points or more
- (b) 50 points for credit towards an award course of between 100 and 200 points, or
- (c) 37.5 points for credit towards a fourth-year bachelor Honours program.

4.32. The following minimum limits apply to credit in a student exchange program is:

- (a) 37.5 points for a 6-month program, and
- (b) 75 points for a 12-month program.

4.33. For study abroad programs, and student exchange programs of less than 6 months duration, there is no minimum credit limit.

4.34. Credit point (load) equivalents for studies undertaken as part of a student exchange program are determined by Melbourne Global Mobility.

Credit and admission arrangements for polytechnic students

4.35. The Board may approve articulation pathways from specific completed polytechnic diplomas into bachelor degrees.

4.36. The granting of credit in such arrangements will depend on:

- (a) the origin and standing of the diploma from which the student is articulating
- (b) the content and standard of the studies undertaken within the diploma, and
- (c) the intentions of the student with regard to their core, major and breadth studies at the University.

4.37. The Board may establish entry pathways based on part-completion of diploma studies but the level of credit will be reduced.

5. Procedural principles

Applying for advanced standing or accelerated subject entry

5.1. Persons seeking advanced standing or accelerated subject entry must apply in the form and timeframe prescribed by the Academic Registrar.

5.2. Applications for advanced standing:

- (a) will not be considered if the student has completed more than half of the credit points for their current course, and
- (b) may not be considered if not submitted in the timeframe required by the Academic Registrar.

Credit and advanced standing for polytechnic students

5.3. Students admitted under arrangements for polytechnic students (see sections 4.34 – 4.36 above) must undertake as a minimum 100 points of study in a bachelor degree, including 25 points of breadth study, and must meet all degree requirements, taking account of any credit granted.

5.4. The maximum credit for polytechnic students that can be granted towards a bachelor degree is distributed as:

- (a) 150 points towards core discipline requirements at first and second year level, depending on the comparability of prior study, and

(b) 50 points towards the breadth requirements at first and second year level.

5.5. Students completing a concurrent diploma may be offered up to 50 points of credit towards the diploma. However the maximum credit awarded in total towards the concurrent diploma and a bachelor degree will be 200 points.

5.6. The relevant dean must determine the credit to be granted towards the core disciplinary or major study components of the degree.

5.7. The relevant dean may award exempt advanced standing where the student has completed studies deemed approximately or effectively equivalent.

5.8. The credit to be granted will depend on the major study a student wishes to undertake, but must be the same regardless of the degree within which the major is undertaken.

5.9. Students will not be required to continue studies begun within their polytechnic diploma. However, a student's choice of major may affect the amount of credit to which they are entitled.

5.10. Credit will be awarded on a discipline-specific basis, rather than an unspecified or block basis, except where block credit is granted towards the breadth component.

5.11. Credit for the breadth component of a bachelor degree will only be granted where the dean determines that the student has completed studies which are deemed equivalent to subjects offered at tertiary level.

Complaints, reviews and appeals

5.12. A student who is dissatisfied with a decision made under this policy may lodge a request for review of the decision in accordance with the [Student Complaints and Grievances Policy](#).

5.13. A student who is dissatisfied with the outcome of the review may lodge an appeal with the Academic Secretary in accordance with the [Student Appeals to the Academic Board Policy](#).

6. Roles and responsibilities

<i>Role/Decision/Action</i>	<i>Responsibility</i>	<i>Conditions and limitations</i>
Considering and determining requests for advanced standing and accelerated subject entry, with or without credit	Dean of relevant faculty or person authorised by the dean to act	
Require a student to demonstrate their competence in the relevant subject area following granting of credit	Dean of relevant faculty or person authorised by the dean to act	Only where there is doubt as to a student's ability to progress to higher level studies, demonstrated by performance in the subject for which credit was given.
Waiver of the time limitations for credit	Dean of relevant faculty or person authorised by the dean to act	Waivers may be granted up to the 10 year time limit only
Waiver of the 10 year time limit for credit	President, Academic Board	
Waiver of the requirements of this policy	President, Academic Board	

Approving specific programs exempt from the requirements of this policy	Academic Board	
Approving articulation pathways from specific completed polytechnic diplomas into bachelor degrees	Academic Board	
Prescribing form, timeframe and other requirements for advanced standing and accelerated subject entry applications	Academic Registrar	
Considering requests for review of decisions made under this policy	Principal Advisor, Student complaints and Grievances, authorised by the Academic Registrar to act	
Considering appeals of decisions made after review	Academic Secretary	

7. Definitions

accelerated subject entry means advanced standing with or without credit points granted for a first-year tertiary subject at the University on the basis of having demonstrated mastery of the content of that subject through secondary studies or other prior work, or an exemption examination in the subject. Where accelerated subject entry is granted without credit points a student is required to complete a subject with equivalent credit points to that subject for which the advanced standing was granted.

advanced standing means the waiving of the need to take a compulsory or core subject or subjects, with or without credit points, granted in relation to a course of study on the basis of studies completed outside that course and/or the University. Where advanced standing is granted without credit points a student is required to complete a subject with equivalent credit points to that subject for which the advanced standing was granted.

breadth means a compulsory component of a New Generation bachelor degree comprising subjects drawn from areas of study outside those offered within the core component of the degree, allowing students to gain an understanding of one or more disciplines that are distinct from the field of their core studies.

compulsory subject means a subject required for completion of a course

core subject means a subject required for completion of a major or specialisation and can also mean a subject required to complete a core component of a degree, such as foundation studies.

credit means advanced standing granted with credit points

cross-institutional study is non-award studies undertaken by a student enrolled in a University of Melbourne award course at another Australian university, for credit towards the University of Melbourne award course.

student exchange program is a formal study program where a student studies at an overseas institution for a fixed period (usually equivalent to either one or two semesters), in accordance with the terms of a student exchange agreement with a partner institution, for credit towards the award course in which they are enrolled at their home institution.

student mobility program is any program under which students study overseas for credit towards their University of Melbourne award course.

study abroad program is a study program where a student studies at an overseas institution for a fixed period for credit towards the award course in which they are enrolled at their home institution. Unlike exchange, study abroad involves the payment of tuition fees to the host overseas institution, either by the student, the home institution or a third party provider, because the arrangement does not fall under a formal student exchange agreement, or because the student is in excess of the number permitted to study under such an agreement with the overseas institution.

University of Melbourne Extension Program (UMEP) is a program in which secondary school students can complete University subjects in parallel with normal school studies.
